

# UNI-PAK<sup>®</sup>

## brings profit to your packaging

**YOU PROFIT BECAUSE YOU SAVE WAGES**—UNI-PAK is a *one-man* bagging-conveying-closing system. It gives you the same output from one man that you now get from two. You save enough to pay for it in about four months; after that, the profit dollars pour into *your* pocket.

**YOU PROFIT BECAUSE YOU SAVE MATERIAL**—UNI-PAK puts just the right amount in each bag. It's automatic, therefore consistent. There's no spillage. Giveaway is at a minimum because the weight is always right.

### AND UNI-PAK GIVES YOU THESE ADDED FEATURES:

**Flexible plant layout** — You can meet changing production requirements easily because UNI-PAK is a complete, compact bagging system mounted on one frame.

1. G17 Automatic Scale with pedestal (height-adjustable)
2. Bag Conveyor with Motor Drive and Starter
3. Sewing Pedestal (adjustable for varying bag heights)
4. Sewing Head (several types avail-

- able) with motor drive and starter
5. Automatic scale controls
6. Balance Indicator (on the scale—graduated in ounces)

Move it where you need it. Requires little headroom. For complete portability, use the mounting wheels supplied as an option.

**Built-in checkweigher**—The balance indicator on the scale is graduated in ounces. The operator can check the accuracy of the bag directly on the scale before releasing it. Therefore, he no
